## **PROJECT SUMMARY FOR TRILLIUM ENERGY INC (GUYANA) TO REQUEST THE APPROVAL FOR LICENSES OF STORAGE AND TRANSPORTATION AND SALE OF FUEL (BUNKERING) BY VESSELS/ TANKERS**

### **TRILLIUM ENERGY**

January 17, 2022

#### **Description**

Trillium Energy Inc parent company CARLAT Petroleum LLC has registered offices in USA and Canada. Since 2003 we have been operating and providing full services through the Caribbean and Latin America in Energy and the Maritime Industry. Our company Trillium Energy Inc is offering to provide the same quality of service products in the Guyana's Market to operate and to provide premium services and products to the people and industries in Guyana.

It is the intent of Trillium Energy Inc to supply petroleum-based products and services throughout various parts of Guyana depending on market availability. We have an interest to provide special emphasis to the industries currently operating in the interior and intra-coastal areas of the country. We see the opportunity to provide value for money in the services and products we will render in our ever-growing Guyana Oil and Gas Sector if given the opportunity.

## Description of the Site

The site for bunkering operation will be conducted in the Demerara River at Trillium Energy Wharf facility located at Friendship, East Bank Demerara. The company is leasing office space and the wharf facility. Trillium Energy Inc. main activity is bunkering of which the wharf facility will accommodate the transfer of the product from one vessel into another and also facilitate the relevant authorities to have access and oversight the operation.

## **Project Design**

Currently there is no development or construction at the site for Trillium Energy Inc. since the Company is now setting up its bunkering operations in Guyana in order to conduct business. The current existing facility will have the site fitted with the necessary infrastructure prior to the commencement of operations to facilitate docking, transferring and access by the relevant authorities. As part of the leasing agreement, Trillium Energy Inc Wharf facility will provide all the necessary resources that will be required for efficient services by the company.

Waste from vessel will be outlined in the Garbage Management Plan submitted within the updated Garbage Management Certificate.

## **Capital Investment:**

Initially our operations will employ 10-15 persons which will have the potential to expand as the business becomes viable and the initial investment into Guyana will be approximately \$3,000,000.00 US Dollars per annum.

## **Potential effects on the Environment**

There may be a very minimum amount spillage of the petroleum products when bunkering will be conducting. However potential impacts on the environment associated with the bunkering of fuel will be low on the surrounding aquatic environment due to close monitoring and mitigation efforts which is part of the Bunkering Plan.

## **Plans to Mitigate Environmental Impact**

Trillium Energy Inc. plans to mitigate any potential impacts by ensuring activities are conducted with best available technologies in keeping with highest international environmental safeguards, these will include strict adherence use of the Bunkering Plan, the Oil Spill Pollution Emergency Plan (OSPEP) among other safety guideline in keeping with MARPOL Regulations. which will be enforce should an event occur.

## **Summary**

In a brief summary, once the Company is granted its licenses to operate in Guyana' water we envision are a growth in employment and economic activity. We envision that our Trillium Energy Inc will have an immediate effect to the companies in Guyana with the usage of our services and will engage the community with the assistance and are available for any additional information or data
