### **Project Summary:**

Global Oil Environmental Services (Guyana) Inc. ("GOES Guyana") intends to build and operate a waste transfer, storage, treatment and disposal facility in Land of Canaan on the west bank of the Demerara River. The facility will be modeled on our Alabama, USA facility. This facility has operated continuously for 20 years on behalf of the major Oil and Gas producers. We look forward to providing our knowledge, experience and capabilities to Guyana and its expanding oil and gas industry.

### **Project Specifics: Waste Transfer, Storage, Treatment and Disposal Facility**

GOES Guyana will construct a waste Transfer, Storage, Treatment and Disposal facility. As a function of the facilities core business, the following lists all parallel services required for operation:

1. Barge and Truck Facility Waste Transfer
  - a. Type of Assets:
    - i. 100-barrel truck
    - ii. 4,500-barrel barge
    - iii. 3" barge transfer header and pipeline
2. Chemical and Mechanical waste treatment
  - a. Type of Assets:
    - i. Mobile Treatment Unit
    - ii. Centrifuge
    - iii. Separation tanks
    - iv. 3" transfer line
3. Hydrocarbon recovery, recycle, and reuse in all E&P waste streams
  - a. Type of Assets:
    - i. Centrifuge
    - ii. Chemical agitation tanks
    - iii. Separation tanks
4. Storage of waste products and recovered phases for recycle/reuse
  - a. Type of Assets:
    - i. 500-barrel frac tanks
    - ii. 3,000-barrel storage tanks
5. Development of Offshore E&P Waste asset cleaning operations
  - a. Type of Assets:
    - i. Automated tank cleaning system

### **Capital Investments:**

Treatment and Facility Investment: \$5,000,000 USD
