

Environmental Protection Agency

Notice to the Public

Pursuant to Section 11(2) of the Environmental Protection Act, Cap. 20:05, the Environmental Protection Agency (EPA) screened the application for the grant of an environmental permit for the following proposed project:

Ms. Jun Ping Che, Mr. Guang Zhao Xiao and Mr. Owen Bowling; Arisarabo Quarry Project – Stone Quarry - Block: GS:23 M:1130/MP/002/2025 at the confluence of Kaidakuri River and Kamudikabra Creek, Potaro Mining District #2.

The EPA has determined that this project will not significantly affect the environment, and is therefore exempt from the requirement to conduct an Environmental Impact Assessment (EIA). However, the project will be required to submit an Environmental Assessment Management Plan (EAMP) outlining mitigative measures for potential project impacts. The reasons for this decision include:

1. Impacts from this project have been characterized to be of medium to low significance since it is to be located at Kaidakuri River and Kamudikabra Creek, an area known for similar land use activities.
2. Impacts from noise generated by the project will be medium and periodic, and confined to the production activities area. Employees will wear their necessary protective gear to minimise the impact of noise during operation.
3. Air quality impacts will be of medium significance and localized, i.e, limited to the confines of the immediate project area; these impacts will be effectively mitigated by preventative maintenance of heavy-duty machinery and the implementation of dust control measures, such as, wet suppression and buffer zones.
4. Impacts to biodiversity and habitats will not be significant because the clearing of vegetation and the extraction of materials will be done in stages allowing for more effective management and control of impacts which will, in turn, reduce habitat destruction.
5. Surface water quality will not be significantly affected by sediment load from loose soil and in storm water runoff because there will be no direct discharge of effluent into any Creek or surface water body due to mitigation measures.

Please be advised that this decision is in no way an indication that this project is approved.

The reasons for our decision are available at the following links on our website:
