

Environmental Protection Agency

Notice to the Public

Pursuant to Section 11(2) of the Environmental Protection Act, Cap. 20:05, Laws of Guyana, the Environmental Protection Agency (EPA) has screened the application for the grant of an environmental permit for the following proposed project:

Blue Water Shipping Inc. - Transportation of Oil and Gas Chemicals.

The EPA has determined that this project will not significantly affect the environment, and is therefore exempt from the requirement to conduct an Environmental Impact Assessment (EIA). The reasons for its decision include:

- 1) The project will not be located within an environmentally sensitive area i.e., it is not located in an area having special environmental attributes that require special care or rare ecosystems or habitats with species at risk.
- 2) Air, soil and water quality will not be significantly impacted given that the project is service-oriented and there are adequate measures in place to prevent spills during transportation.
- 3) All vehicles and equipment will be maintained or serviced according to the manufacturer's specifications in an effort to reduce noise emission levels.
- 4) The application and project summary submitted outlined adequate mitigation measures for land, water, air & noise emissions from the project.

Please be advised that this decision is in no way an indication that this project is approved. The reasons for our decision are available at the following links on our website:

Project Summary Tab
