

Environmental Protection Agency

Notice to the Public

Pursuant to Section 11(2) of the Environmental Protection Act, Cap. 20:05, Laws of Guyana, the Environmental Protection Agency (EPA) has screened the application for the grant of an environmental permit for the following proposed project:

CB Gas (LPG Bottling and Distribution Facility) - Track CCGI, Industrial Site, Amelia's Ward, Linden, Region 10, Guyana

The EPA has determined that this project, for the following reasons, will not significantly affect the environment and is, therefore, exempt from the requirement to conduct an Environmental Impact Assessment (EIA).

1. The proposed project site is not located within an environmentally sensitive area and does not contain any special environmental features, critical habitats, or species of conservation concern.
2. Adequate mitigation measures to control potential impacts to air quality, soil, surface water, and noise have been outlined for the proposed project.
3. Potential air quality impacts from LPG transfer and bottling activities, vehicle movements, spray painting, and the standby generator will be minimized through the use of closed transfer systems, fixed gas monitoring, regular leak detection and maintenance, and controlled spray-painting activities.
4. Noise impacts from pumps, compressors, filling equipment, the standby generator, and vehicle movements will be minimized through equipment maintenance, acoustic controls, vibration isolation measures, and restricting unnecessary idling and operations to approved working hours.
5. Potential impacts to surface water and soil from accidental spills of fuels, lubricants, and other maintenance materials will be managed through secondary containment, spill prevention and response procedures, spill kits, routine inspections, and appropriate waste and wastewater management.

Please be advised that this decision is in no way an indication that this project is approved.

Project Summary Tab
