

Environmental Protection Agency

Notice to the Public

Pursuant to Section 11(2) of the Environmental Protection Act, Cap. 20:05, Laws of Guyana, the Environmental Protection Agency (EPA) has screened the applications for the grant of an environmental permit for the following proposed projects:

- **Christopher Williams – CNH Establishment Incorporated – Sand and Loam Mine- Confluence of Hubudebu River and Labba Creek, within Block C-1067/MP/000/2023.**
- **Christopher Williams – CNH Establishment Incorporated – Sand and Loam Mine - Confluence of Hubudebu River and Labba Creek, within Block and Block C-1067/MP/001/2023.**

The EPA has determined that these projects will not significantly affect the environment and are therefore exempt from the requirement to conduct an Environmental Impact Assessment (EIA). The reasons for EPA's decision include:

1. Impacts from noise will be low to moderate and will be periodic. Impacts will be confined to the production activities area. Employees will wear their necessary protective gear to minimise the impact of noise during operation.
2. Air quality impacts will not be significant because all impacts would be within the confines of the immediate project area and will be effectively mitigated by preventative maintenance of heavy-duty machinery and the implementation of control measures such as wet suppression and buffer zones.
3. Impacts to biodiversity and habitats will not be significant because the clearing of vegetation and the extraction of materials will be done in stages allowing for more effective management and control of impacts which will, in turn, reduce habitat destruction.
4. Surface water quality impacts will not be significantly affected by sediment load occurring from loose soil and sediments in storm runoff because there will be no direct discharge of effluent into any Creek or surface water body.
5. The developer will ensure that waste will be recycled and reused as well as utilize appropriate disposal techniques in keeping with the Agency's Hazardous Waste Guidelines.

Please be advised that this decision is in no way an indication that this project is approved.

The reasons for our decision are available at the following links on our website:

Project Summary Tab
