

Environmental Protection Agency Notice to the Public

Pursuant to Section 11(2) of the Environmental Protection Act, Cap. 20:05, Laws of Guyana, the Environmental Protection Agency (EPA) has screened the application for the grant of an environmental permit for each of the following proposed project:

Success International Sawmill & Boat Service - Logging and Operation of one Portable Mill, located at Morganston, Right Bank Berbice River

The EPA has determined that this project will not significantly affect the environment and is therefore exempt from the requirement to conduct an Environmental Impact Assessment (EIA). The reasons for this decision are as follows:

1. To minimise impacts on the environment, including biodiversity, this project will implement harvesting practices following the Code of Practice for Forest Operations and the guidelines set by the Guyana Forestry Commission (GFC), such as:
 - a. ***Selective Logging***: careful selection of individual trees to harvest and leaving the majority of the forest intact; and
 - b. ***Reduced Impact Logging (RIL)***: directional felling of trees for the least disturbance to the forest and minimal damage to surrounding trees and soil.
2. Noise and vibration, from the activity, stemming primarily from logging and milling activities, machinery, and transportation will have environmental impacts, particularly on wildlife. These impacts will be mitigated by:
 - a. Limiting operations to non-critical periods;
 - b. Scheduling noisy activities when they are least likely to disturb wildlife e.g. outside of breeding or nesting seasons;
 - c. Limiting or avoiding operating at night;
 - d. Regular maintenance of machinery; and
 - e. Enforcing speed limits for vehicles during transportation
3. **Waste produced in the operations will be managed by**
 - a. Separation into organic, inorganic, hazardous, and recyclable wastes;
 - b. Composting organic waste (e.g., food scraps, plant material) to produce natural fertilizer in a designated area away from water sources;
 - c. Repurposing wood waste (sawdust, wood chips, offcuts) for compost, landfilling, or as fuel.
 - d. Safely store hazardous materials, such as waste oil, in labelled containers and reuse waste oil for chainsaws, the generator, and the portable mill.

Please be advised that this decision is in no way an indication that this project is approved.

The reasons for our decision are available at the following links on our website:

Project Summary Tab
