

Environmental Protection Agency Notice to the Public

In accordance with **Section 11(2) of the Environmental Protection Act, Cap 20:05, Laws of Guyana**, the Environmental Protection Agency (EPA) has screened the application for the granting of an Environmental Authorization for the following proposed projects:

OPERATION OF A GAS STATION AND FUEL STORAGE FACILITY

- ***Mohabir Mangar - (Fuel Storage) – located at Fair View Village Kurupakari Crossing, Essequibo River, Region #9.***
- ***Javed Ali (SHI-OIL Lethem Fuel Storage) – LM50, Bon Success, Lethem, Region #9.***

Pursuant to **Section 11 (2) of the Environmental Protection Act**, the EPA has determined that the proposed project/activity will not significantly affect the environment and is therefore exempt from the requirement to conduct an **Environmental Impact Assessment (EIA)**. **However, the projects will be required to submit an Emergency Response Plan (ERP).**

The reasons for the EPA's decision regarding the aforementioned project include:

1. The risk of spills is expected to be negligible, as the project's design incorporates embedded controls and mitigation measures, including double-walled underground fuel storage tanks and bund walls with 110% capacity for above-ground tanks. These measures will minimize or mitigate potential impacts on immediate receptors, including flora, fauna, and human health.
2. Impacts on waterways are expected to be negligible, as the project site is not located near any major waterways; therefore, no direct discharge of effluent from the facilities is anticipated.
3. Impacts on air quality will be negligible since these projects will not emit significant air pollutants such as particulate matter, Volatile Organic Compounds (VOC), Sulphur dioxide (SO₂) and Nitrogen oxide (NO_x).

Please be advised that this decision is in no way an indication that these projects are approved.

The Project Summaries are available at the following links on our website:
