

Environmental Protection Agency

Notice to the Public

Pursuant to Section 11(2) of the Environmental Protection Act, Cap. 20:05, Laws of Guyana, the Environmental Protection Agency (EPA) has screened the application for the grant of an environmental permit for the following proposed project:

Nexus Machinery & Fabrication Inc.- Electrical Power Generation with supporting Fuel (Diesel) Storage

The EPA has determined that this project, for the following reasons, will not significantly affect the environment and is, therefore, exempt from the requirement to conduct an Environmental Impact Assessment (EIA).

1. The proposed project location is not environmentally sensitive; it has no special environmental attributes, rare ecosystems, habitats, or species at risk.
2. This is an existing project that has a 2500L fuel storage tank.
3. The facility is shared between Superior Energy Services Guyana -Stabil Drill and Qualco Inc.
4. There were three (3) generators onsite; however, **only one was being utilized for the current activities**. The three generators include: a 360 KVA Perkins genset (owned by Nexus), a 22 KVA capacity genset (owned by Stabil Drill but was only being stored onsite), and a 17 KVA capacity (rented) genset, which was operational because Nexus's genset was being serviced at the time of inspection.
5. Adequate measures to mitigate emissions to air, noise, water and hazardous waste management have been outlined in the project's application for environmental authorization. These measures include :
 - a) The generator is routinely inspected and serviced in accordance with the manufacturer's maintenance schedules to ensure reliable operation, maximize equipment lifespan, and minimize the potential for mechanical failure.
 - b) The fuel will be housed within a bund wall on an impervious base; and
 - c) All fuel transfer processes will utilize drip pans, containment for the fuel pump, and seals and unions at connection points.

Please be advised that this decision is in no way an indication that this project is approved.
