

# Environmental Protection Agency

## Notice to the Public

Pursuant to Section 11(2) of the Environmental Protection Act, Cap. 20:05, Laws of Guyana, the Environmental Protection Agency (EPA) has screened the application for the grant of an environmental permit for the following proposed project:

### **S and R Business Establishment - Ice Manufacturing (Cube/Crush Ice Factory)**

The EPA has determined that this project, for the following reasons, will not significantly affect the environment and is, therefore, exempt from the requirement to conduct an Environmental Impact Assessment (EIA).

1. The proposed project site is not located within an environmentally sensitive area and does not contain any special environmental features, rare ecosystems, critical habitats, or species of conservation concern.
2. Adequate mitigation measures to control potential impacts to soil, water, air quality, and noise levels have been outlined in the project's application for Environmental Authorization.
3. Noise emissions from compressors, refrigeration systems, and the standby generator will be minimized through enclosure within a concrete structure, routine maintenance, and restricted generator use during power outages.
4. Risks to soil and surface water from fuel storage, spills, and operational activities will be managed through secondary containment, impervious surfaces, spill prevention and response procedures, and proper storage practices.
5. Process water will be recycled through an on-site reservoir, and any discharge will comply with applicable effluent guidelines.

Please be advised that this decision is in no way an indication that this project is approved.

### **Project Summary Tab**
