Subject: **Request for the Approval for a License for the Storage, Transportation and distribution of fuel (bunkering) by vessels**

Reference: L-PL-SV-EPA-001
Our reference: BGU-GM-2026-027
Your reference: n/a
Contract No.: n/a
Project: Delta Resolute

Dear Sirs,

Delta Logistics Ltd. requires the services of bunkering vessels to support offshore development and Production activities in Guyana; for Bourbon Guyana Inc is therefore requesting a license for the storage, transportation, and distribution of fuel for the following vessels:

- Delta Resolute IMO 9521667

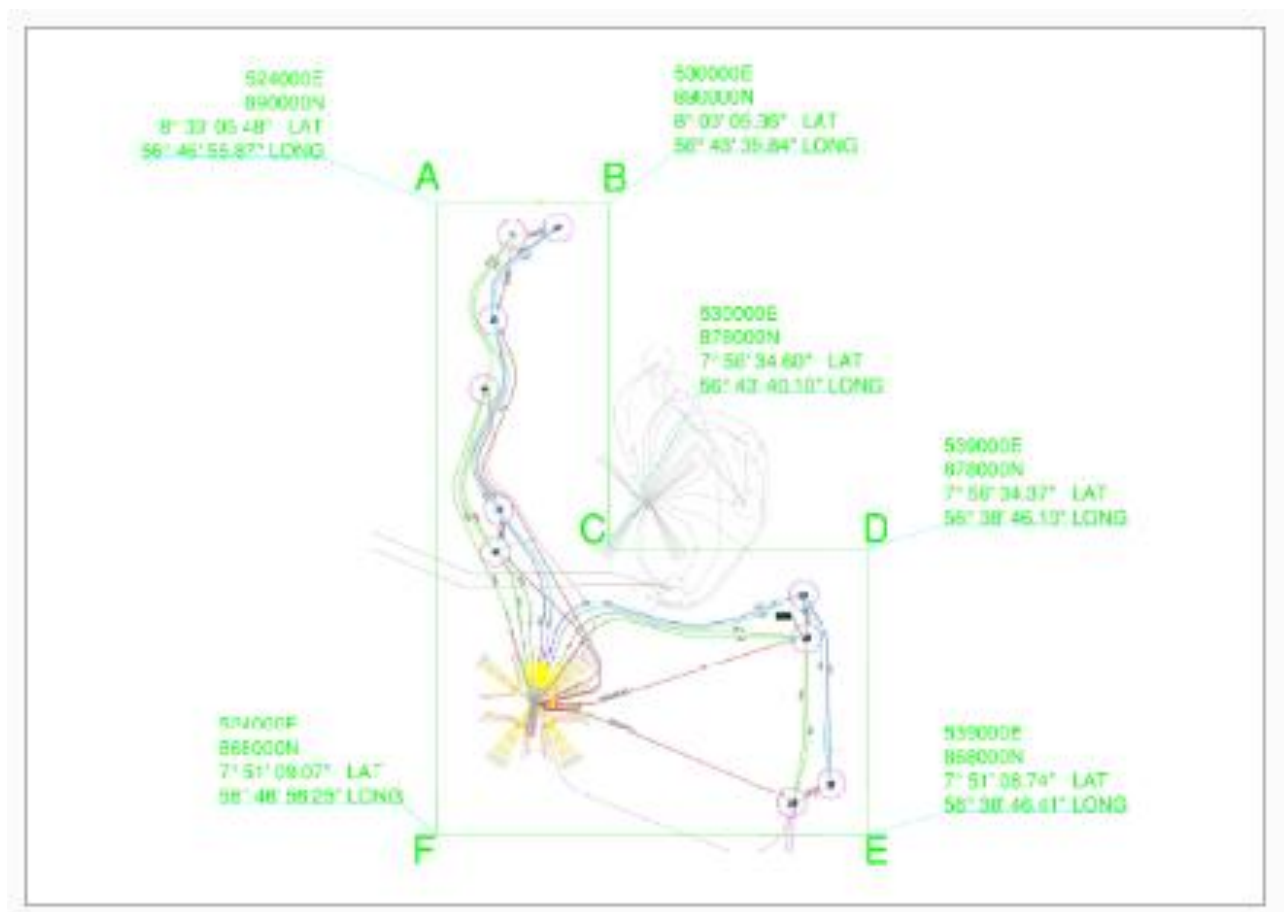

In this respect Esso Exploration and Production Guyana Limited (EEPGL) and their Contractor Saipem Guyana Inc has requested Bourbon Guyana Inc to provide Offshore Support Vessels to support their Construction Projects ongoing at the projects.

Area of Operation (Block Name): Exxon Stabroek Block

Coordinates (To be provided in Geographical Format – D° M'.mmm):

No.	Latitude (N)	Longitude (W)	Remarks
1*	8° 03' 05.48"	56° 46' 05.87"	WGS84 (Zone 21)
2*	8° 03' 05.36"	56° 43' 39.84"	WGS84 (Zone 21)
3*	7° 56' 34.60"	56° 43' 40.10"	WGS84 (Zone 21)
4*	7° 56' 34.37"	56° 38' 46.13"	WGS84 (Zone 21)
5	7° 51' 08.44"	56° 38' 46.41"	WGS84 (Zone 21)
6	7° 51' 09.07"	56° 46' 56.25"	WGS84 (Zone 21)

**Bunkering Operations in Guyana**

Delta Logistics Limited will operate one (PSV) Platform Supply Vessel "Delta Resolute" in the Starbroek Block field.

The above vessel can sail under its own power and on its own keel. In this regard it is anticipated that Delta Logistics limited will encounter the following constraints associated with bunkering these offshore Vessels / Barges;

- Saipem Stationary Project vessels:
These types of vessels (Construction vessels) are required to remain offshore and therefore need an offshore bunkering solution.
- Sailing vessels (on their own keel):
Do have the ability to sail into one of the ports in Georgetown however will encounter:
 - Limited port refueling facilities
 - Long sailing times for offshore vessels
 - Additional traffic to the local port activities

For the above stated reasons Delta Logistics Limited proposes to use it's (PSV) Platform Supply Vessel as a bunkering vessel which will provide services exclusively to the Saipem construction fleet during the project.

Specs of this individual vessel has been provided to EPA in our applications.

Potential effects on the Environment

Offshore bunkering can pose a pollution risk to the marine environment in the unlikely event that a spill should occur. Based on thorough management and mitigation measures, supported by the inductions and training of crew with close monitoring during operations, Delta logistics Limited will strive to maintain preventative measures to reduce the likelihood of a spill occurring during bunkering offshore.

These measurements shall include but are not limited to the following:

- Project Spill Prevention Plan (provided in support of this application).
- Rigorous Hazard Identification and Risk Assessment (HIRA) for offshore bunkering.
- Bunkering procedure and checklist.
- Bunkering Manual (provided in support of this application).
- Induction and training of crew.

Delta Logistics Limited objective is to minimize and prevent risks to the environment; However, in the highly unlikely event of a spill the vessel's Shipboard Oil Pollution Emergency Plan (SOPEP) provides spill response details and the Delta Resolute shall be equipped with a SOPEP spill kit and equipment. Training drills are conducted regularly, and at minimum quarterly with all vessel crews with respect to spill prevention and response.

Supporting Documentation

In support of this application please see the following information package:

- Delta logistics Limited Bunkering Permit Application forms for Delta Resolute
- Vessel particulars
- Certificates of Registry
- International Oil Pollution Prevention Certificates
- International Air Pollution Prevention Certificates
- In Water Authorizations from the Maritime Administration (MARAD)
- International Energy Efficiency Certificates
- International Sewage Pollution Prevention Certificates
- Insurance Certificates
- Attestations regarding compliance with the Ballast Water Management Convention
- Statements of Compliance for Prevention of Pollution by Garbage
- SOPEP Manuals
- Bunkering Manuals
- Project Spill Prevention Plan

Yours Faithfully,

Nigel Mac Leish

Port Captain/Head of Marine Operations
