

Project Summary: General Waste Disposal Company for Guyana Environmental Protection Agency (EPA) Approval

Project Title: Establishment of a General Waste Disposal Company in Guyana

Project Proponent: N&S Enterprise

Location: 304-305 Independence Boulevard, Georgetown, Guyana.

Objective:

The project aims to establish a comprehensive waste disposal company in Guyana to address the growing need for efficient, sustainable, and environmentally compliant waste management solutions. The company will provide safe and reliable waste collection, transportation, treatment, and disposal services for residential, commercial, and industrial clients, while adhering to the environmental standards and regulations set by the Guyana Environmental Protection Agency (EPA).

Scope of Services:

1. **Waste Collection:** Regular and on-demand collection of general solid waste, recyclables, and non-hazardous materials from residential, commercial, and industrial clients.
2. **Waste Transportation:** Use of EPA-approved vehicles and containers to transport waste to designated treatment or disposal facilities.
3. **Waste Treatment and Disposal:** Implementation of environmentally sound methods for waste treatment (e.g., composting, recycling) and disposal (e.g., sanitary landfill operations).
4. **Recycling Initiatives:** Promotion of waste segregation and recycling programs to reduce landfill dependency and promote a circular economy.
5. **Public Awareness Campaigns:** Educational programs to raise awareness about proper waste disposal practices and environmental conservation.

Environmental and Social Benefits:

- Reduction in illegal dumping and improper waste disposal practices.
- Minimization of environmental pollution (air, water, and soil) through controlled waste management processes.
- Contribution to public health improvement by reducing waste-related hazards.
- Creation of employment opportunities for local communities.
- Support for Guyana's sustainable development goals and climate resilience efforts.

Compliance with EPA Regulations:

The project will strictly comply with the Environmental Protection Act of 1996 and all relevant EPA guidelines, including:

- Conducting an Environmental Impact Assessment (EIA) to identify and mitigate potential environmental risks.
- Implementing measures to control odors, leachate, and greenhouse gas emissions.
- Ensuring proper site selection, design, and operation of waste disposal facilities.
- Monitoring and reporting on environmental performance to the EPA.

Project Timeline:

- **Phase 1:** Feasibility Study and EIA (3-6 months)
- **Phase 2:** Site Preparation and Infrastructure Development (6-12 months)
- **Phase 3:** Operational Launch and Service Rollout (3-6 months)

Estimated Budget:

The total estimated budget for the project is \$25,000,000 (twenty-five million dollars) covering land acquisition, infrastructure development, equipment procurement, operational costs, and environmental management measures.

Conclusion:

This project represents a critical step toward improving waste management practices in Guyana, ensuring environmental sustainability, and supporting the country's development goals. We seek the Guyana EPA's approval and guidance to move forward with this initiative, which aligns with national and international environmental standards.
