Project Overview

Location – ODITC located at Market Road, Lusignan, ECD

Contact – Alan Sharp – 6329982 – Email – alan.sharp@3tenermech.com

Project

The services we plan to add to our existing business will not require any construction as we are utilizing an existing building to accommodate this service. As the services are related to medical it must be noted we will not be handling any human samples and laboratory work associated with such a business offering. Our services are largely physical and non-invasive testing. Below is a list of these services;

- OEUK (Offshore Energy UK) medical protocols (for the O&G sector)
- TB Skin Testing
- Audiometry Testing
- Fitness testing via Chester Step Test
- Pre-employment and work visa medical testing
- Drug and Alcohol Testing (via urinalysis and breathalyzer)

The range of testing and assessments is critical to ensure all persons traveling offshore have received the necessary testing/assessments as per Exxon and the Guyana government's requirements.

Risk Management

Mitigation

- All persons performing testing and medical assessments are qualified nurses and doctors, with all doctors registered and in date under the Medical Council of Guyana.
- All equipment being used is under control from our Quality Manager.
- All equipment has clear working instructions.
- All medical personnel are provided with appropriate PPE to perform necessary testing and assessments.
- For the use of needles on the TB – Skin Test, Sharp bins are provided. This can be viewed during site visit.
- All wipes and any with blood residue due to finger prick test for blood sugar levels and after Tuberculin has been administered have its own biohazard wastes bins. All have red plastic bags identifying a biohazard.
- All biohazard materials will be picked up by Midway Specialty Care Center.
