

Environmental Protection Agency

Notice to the Public

Pursuant to Section 11(2) of the Environmental Protection Act, Cap. 20:05, Laws of Guyana, the Environmental Protection Agency (EPA) has screened the application for the grant of an environmental permit for the following proposed project:

1. Construction and Operation of Nyron Sookram Irrigation Well At 447 Silverhill, Soesdyke Linden Highway

The EPA has determined that this project will not significantly affect the environment, and is therefore exempt from the requirement to conduct an Environmental Impact Assessment (EIA). The reasons for its decision include:

1. Impacts will be medium to low since the project site is suitably located in an agricultural zone where activities of similar nature exist.
2. Impacts from noise will be low to moderate and primarily during construction. Intermittent use of equipment will be employed to mitigate noise impacts.
3. Impacts from dust pollution will be moderate primarily during construction which will be short-term and localized. Mitigation of fugitive dust will include wet suppression of stockpiles during construction where practical.
4. General waste disposal will be provided by local private waste management services with assurance of safe disposal at a sanitary landfill site.
5. The project is not in close proximity to any protected areas. Impacts on surrounding flora and fauna will be moderate and primarily during construction. The developer will prioritize biodiversity protection as far as possible.

Please be advised that this decision is in no way an indication that this project is approved.

The reasons for our decision are available at the following links on our website:

Screening Decision- Nyron Sookram
