

Environmental Protection Agency

Notice to the Public

Pursuant to Section 11(2) of the Environmental Protection Act, Cap. 20:05, Laws of Guyana, the Environmental Protection Agency (EPA) has screened the application for the grant of an environmental permit for the following proposed project:

QualiTEST Medical Laboratory – Health and Medical Facility at Lot 57 Dennis Street, Campbellville, Georgetown, Guyana

The EPA has determined that this project will not significantly affect the environment, and is therefore exempt from the requirement to conduct an Environmental Impact Assessment (EIA). The reasons for its decision include:

- 1) The project is proposed to be a small medical facility that will in no way negatively impact the surrounding environment. The activities of the project will not result in significant elevations of the ambient air quality nor will it produce noise or vibrations above acceptable levels.
- 2) The project will not impact waste management in the environment as bio-hazardous waste will be disposed of weekly by GPHC while domestic waste will be disposed of weekly by EPA-approved waste disposal services. This will prevent waste accumulation at the Project site and the surrounding environment.
- 3) The project is not located within an environmentally sensitive area, that is, it is not located in an area having special environmental attributes that require special care or rare ecosystems or habitats with species at risk.

Please be advised that this decision is in no way an indication that this project is approved.

The reasons for our decision are available at the following links on our website:
